OREGON AGRICULTURAL STATISTICS & DIRECTORY

This publication is designed as a reference tool for Oregon agricultural producers and organizations combining Oregon agricultural statistics and resources into one handy guide.

We'd like to thank the USDA National Agricultural Statistics Service and other agricultural organizations who have provided information.

This guide replaces the previously produced *Agripedia* publication and includes the most recent statistical information and directory information as of December 2020. Comments and suggestions for future editions of this handbook should be forwarded to:

Alexis Taylor, Director
Oregon Department of Agriculture

Welcome to Oregon's Agricultural Statistics and Directory!

Home to one of the most diverse agricultural industries in the nation, Oregon's more than 220 high-quality agricultural products are known and loved worldwide and continue to be in demand locally, domestically, and internationally. Our farmers, fishers, and ranchers are also varied, living and working in different climates and using different methods, in all corners of the state. Oregon's 37,200 farms, spread across 16 million acres, grow, raise, and harvest top

commodities including nursery products, cattle and calves, hay, grass seed, milk, wheat, wine grapes, and more. A dozen commodities each have a production value of more than \$100 million dollars. Plus, Oregon leads the nation in the production of hazelnuts, grass seed, Christmas trees, and blueberries.

Oregon agriculture encompasses farms to food and beverage processing, innovative technology, research, and agricultural education. Oregon agriculture directly and indirectly contributes 686,518 jobs, \$29.71 billion in wages, \$12.12 billion in taxes, and \$2.85 billion in exports to the state. There is approximately one farm or ranch for every 112 people in Oregon, but that small percentage is an essential contributor to the state's economy.

This publication includes easy-to-read agricultural data and statistics and a directory section with important contact information for a wide variety of groups, organizations, and agencies that are all connected to agriculture. It is my sincere hope that you find this publication useful and educational. Please share what you learn with family, friends, and neighbors.

One of the best parts of my job as director of the Oregon Department of Agriculture (ODA) is sharing the state's accomplishments and growing trends that keep Oregon on the cutting edge of emerging agricultural products, food, and beverages. Enjoy all this publication has to offer and for more information on what ODA is doing, and how we are fulfilling our mission of ensuring healthy natural resources, environment, and economy—please find us on Facebook @ORAgiculture and Twitter @ORagriculture for the latest updates.

STATISTICS

Dave Losh, Oregon State Statistician

U.S. Department of Agriculture
National Agricultural Statistics Service

We are pleased to present the 2020 Oregon Annual Statistical Bulletin. These data are prepared and printed through a special cooperative agreement between the Oregon Department of Agriculture and USDA's National Agricultural Statistics Service, Oregon Field Office, and provide a comprehensive summary of the state's agriculture—both current and historic.

Thank you to the thousands of Oregon producers and agribusinesses whose voluntary cooperation provided the basic data for this publication. The cooperation of Oregon farmers and ranchers has always been outstanding and we acknowledge their support!

The diverse scope of products that Oregon farmers and ranchers raise, provide a solid foundation for both the rural and urban sectors of this state. The farm economy was again challenging for farmers and ranchers in 2019, in both Oregon and nationally. Data from the 2017 Census of Agriculture showed net farm income decreased 9 percent in Oregon from 2012 to 2017. Lower commodity prices and increased expenses, especially labor, were the main factors in the decrease. Producers also faced challenges of trade barriers to Asian rim countries since many Oregon grown commodities are in demand because of their high quality. Then with COVID-19 interruptions to the supply chain in the spring of 2020, financial help was needed to supplant the loss of demand for commodities raised in 2019. NASS statistics were one of the sources of data used to set the level of aid provided to Agriculture.

Dedicated enumerators, employed by the National Association of State Departments of Agriculture (NASDA), relentlessly strive to obtain the best information about Oregon agriculture and are appreciated for their contribution to this publication. They have remained flexible and were limited to only collecting data by telephone during the COVID-19 pandemic.

All of the data on Oregon agriculture is released publicly, to all at the same time, and can be found on our Northwest Region website at www.nass.usda.gov/or

Please feel free to contact me via email at: Dave.Losh@usda.gov

9-State ⁶	21.70	19.90	25.70	23.50	21.00	23.00

(S) Insufficient number of reports to establish an estimate.

¹ The average rates are based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Cattle Survey.

² Animal unit (AUM) rate includes survey rates for both animal unit and cow-calf. The rate is converted to an AUM rate using a multiplier factor of 0.833. The multiplier factor is the conversion of a 1,200 pound cow to a 1,000 pound cow.

³ 17 Western States: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming.

⁴ 16 Western States: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington, and Wyoming.

⁵ 11 Western States: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

⁶ 9 Great Plains States: Colorado, Kansas, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

Number of Colonies, Yield, Production, Stocks, Price, and Value – Oregon: 2010-2019

[Producers with five or more colonies. Colonies which produced honey in more than one State were counted in each State.]

Year	Honey producing colonies ¹	Stocks December 15 ²	Honey			
			Production		Value	
			Yield per colony	Total	Price per pound ³	Total ^{4 5}
	(1,000)	(1,000 pounds)	(pounds)	(1,000 pounds)	(cents)	(1,000 dollars)
2010.....	59	874	39	2,301	163	3,751
2011.....	60	755	34	2,040	168	3,427
2012.....	60	845	32	1,920	216	4,147
2013.....	62	456	35	2,170	239	5,186
2014.....	71	767	40	2,840	220	6,248
2015.....	71	809	38	2,698	243	6,556
2016.....	74	622	35	2,590	191	4,947
2017.....	78	998	40	3,120	210	6,552
2018.....	93	1,009	35	3,255	236	7,682
2019.....	87	1,141	32	2,784	207	5,763

¹ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year.

² Stocks held by producers.

³ Average price per pound based on expanded sales.

⁴ Value of production is equal to production multiplied by average price per pound.

⁵ Due to rounding, total colonies multiplied by total yield may not equal production.

Value of Trout Sold and Distributed and Trout Lost, Intended for Sale — Oregon: 2015-2019

Location and year	Total value of fish		Trout lost

AGRICULTURAL MARKETING SERVICE (AMS)

AMS administers programs that create domestic and international marketing opportunities for U.S. producers of food, fiber, and specialty crops. AMS also provides the agriculture industry with valuable services to ensure the quality and availability of wholesome food for consumers across the country. Much of the agency's support for agriculture is provided through commodity-specific efforts, such as its Dairy; Specialty Crops; Livestock, Poultry and Seed; and Cotton and Tobacco Programs. AMS also oversees the National Organic Program; Science and Technology Program; and the Transportation and Marketing Program. AMS also provides regulatory oversight for over 20 research and promotion programs, and enforces other Federal regulations such as the Perishable Agricultural Commodities Act (PACA) and the Seed Act.

ODA FOOD SAFETY AND ANIMAL HEALTH PROGRAMS

Food Safety and Animal Health Programs inspect all facets of Oregon's food distribution system (except restaurants) to ensure food is safe for consumption including shellfish biotoxin testing, oversee shellfish plat leasing, protect and maintain animal health, and ensure animal feeds meet nutritional and labeling standards. In the food safety portion of the program area, nearly 12,000 food establishments in Oregon are licensed and inspected. Programs respond to food safety issues to protect the public while working with the food industry through education and collaboration to prevent unhealthy or unsafe conditions in the food supply. In the animal health portion of the program area, Oregon's livestock industries and their markets are protected through programs that test for, control, and eradicate animal disease.

ODA MARKET ACCESS AND CERTIFICATION PROGRAMS

Market Access and Certification Programs assist Oregon's agricultural producers to successfully sell and ship product to local, national, and international markets. The marketing program promotes and creates demand for Oregon agricultural products. The inspection and certification programs add value by making products more marketable, facilitate product movement, and overcome trade barriers and technical constraints affecting agriculture. The weights and measures programs work to create equity, trust, and confidence in the market by promoting national standards of accuracy in measurement which touch all areas of commerce. These programs reach rural and urban areas alike to create jobs and sustainable opportunities for the state's multi-billion dollar agricultural sector and beyond.

ODA NATURAL RESOURCE PROGRAMS

Natural Resource Programs address water quality and natural resource conservation on agricultural lands, regulation of confined animal feeding operations, and the appropriate use of pesticides, labeling and sale of fertilizer. Through outreach efforts, compliance, monitoring, and coordination with other natural resource agencies, the programs help landowners meet society goals in a manner that makes both economic and environmental sense. In addition, maintaining high quality agricultural land in production is an important long-term strategy for Oregon. The Land Use Program provides technical assistance to farmers as well as local, regional, and state governments on land use proposals.
